Gamet offers a complete line of accessory items to make your truck probe sampling system complete. By adding components to your system you allow your operator to be more productive. Ticket conveying systems, excess grain return systems, long distance sample conveying systems, traffic control signal lights, intercom systems, CCTV and signal alarms are among the items that will speed up and automate your truck probe sampling system.

- **Spade Ports & Grasping Kit**
- **Bridge & Support Structures**
- **Closed Circuit Monitoring Equipment**
- **Traffic Direction Signals**
