

Color Video Monitoring System

System Includes:

- ◆ Industrial 17" LCD color monitor
- ◆ LCD monitor wall mounting bracket
- ◆ Capture Advance weatherproof color camera with IR function for low light use
- ◆ Camera transformer
- ◆ Co-Axial connection cable
- ◆ Co-Axial cable fittings
- ◆ Switcher or DVR are available for multiple camera systems

For applications where a truck probe operator does not have clear vision into the truck bed, a color video monitoring system is a cost-effective and easy to use way to monitor probe system use. Whether the truck probe is hundreds of feet away from the office or the operator does not have a clear line of sight, clear observation of the work area is a must. All cameras provided are for use outdoors and feature IR Illuminators allowing use in all light conditions.

Our camera systems can be used for facility security applications as well. Gamet can help customize your camera system to meet all of your needs.
